

# AqueenaEvo

99.9% **HEALTHY CLEAN WATER**

**LIVE BETTER. LIVE LONGER**

**zepter®**

Don't just drink water —  
drink **Healthy Clean** water.

## AqueenaEvo

### Every Drop, **99.9% Healthy-Clean**

AqueenaEvo is a state-of-the-art **direct-flow (no-reservoir)** water purification device.

It delivers up to **2,000 liters of clean water per day** — instantly, whenever and whatever you need it for.

Powered by a unique **7-stage reverse osmosis system**, AqueenaEvo removes 99.9% of contaminants, ensuring every drop supports your health and longevity.

# Effectively Removes 99.9% of:

## **Bacteria**

Including total coliforms, safeguarding you from waterborne illnesses.

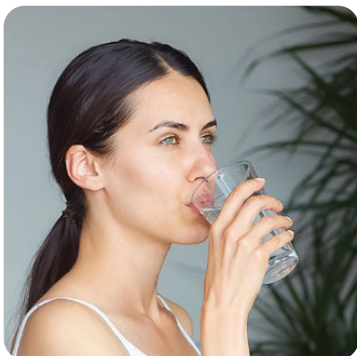

## **Heavy metals**

(Lead, Arsenic, Cadmium, Mercury, and Chromium) – protecting your brain, organs, and overall well-being.

## **Harmful chemicals**

Chlorine, fluoride, nitrates, chlorate, and the concerning PFOS & PFOA “forever chemicals”.

..... only Healthy Clean Water is *the Foundation of a Healthy Life* .....

AqueenaEvo uses an advanced **dual-filter system** to purify water in **7 stages** – delivering 99.9% contaminant-free hydration with every drop.

#### Stage 4 – PAC Filter

**Micron Precision Filtration (5 Microns material)** filters residual carbon particles and safeguards downstream components.

#### Stage 3 – PAC Filter

**Activated Block Filtration:** Targets residual chlorine, chloramine, and volatile organic compounds (VOCs).

**Adsorption technology:** Reduces unpleasant tastes, odors, and water discoloration.

#### Stages 1 & 2 – PAC Filter

**Dual-Layer PP Sediment Filtration:** Outer loose layer and inner tight layer for progressive filtration.

**Enhanced efficiency:** Captures solid impurities, including sediment, rust, suspended particles, colloids, and larger particulates.

## Stage 5 – RO Filter

### Reverse Osmosis (RO) Membrane guarantees a high-efficiency removal:

Reduces inorganic salts, organic compounds, heavy metals, hardness minerals (calcium/magnesium), and microorganisms.

## Stage 6 – PAC Filter

**Pure Water Chamber with TDS elimination:** Holds filtered water while maintaining system hygiene.

**Automatic membrane soak:** Recirculates pure water during shutdown to preserve RO membrane performance.

## Stage 7 – RO Filter

### Final Micron Precision Filtration (5 Microns material):

Ensures polished water quality by capturing any remaining particulates.

## Clean water is the foundation of energy, clarity, immunity, and longevity.

Every cell and every function depends on it. Adults should consume between **2–3 liters** of water daily, while children require **1–2 liters**, depending on age and activity level. Clean water is vital for **cooking, washing fruits and vegetables, feeding pets**, and even protecting your **kitchen appliances** like kettles and coffee machines.

You truly don't know what's in the water you inevitably use every day!

# The Hidden Truth

**Tap water** travels through aging pipes and treatment plants, carrying **Pb, chlorine byproducts, bacteria, PFAS,** and traces of **pharmaceuticals** like antibiotics and hormones.

**Plastic bottles** take centuries to degrade and can **release chemicals** like **Sb** and **BPA** into the drinking water.

**Pitcher filters** may improve taste, but often **fail to remove heavy metals, PFAS, microplastics, antibiotics,** and **hormones.**

# Our body is **70% water**

Consuming tap water, bottled water, or other chemically treated sources can introduce heavy metals, pesticides, industrial pollutants, and disinfectant byproducts into your body, placing chronic stress on your vital organs.

# The Hidden Health Risks of Water That Isn't Properly and Fully Cleaned

## 1. Cognitive & Neurological risks

- **Poor concentration & memory loss** – Heavy metals like lead and mercury impair brain function, especially in children, reducing focus and cognitive ability.
- **Increased risk of neurological disorders** – Long-term exposure to contaminants like arsenic and PFAS (“forever chemicals”) is linked to Alzheimer’s, Parkinson’s, and developmental disorders.

## 2. Hormonal & Metabolic Disruptions

- **Hormonal imbalances** – Endocrine disruptors, such as BPA, PFAS, and pharmaceutical residues (hormones, antibiotics), interfere with hormone regulation, leading to fertility issues, thyroid dysfunction, and weight gain.
- **Metabolic issues & diabetes risk** – Studies suggest chemical exposure from contaminated water contributes to insulin resistance and metabolic syndrome.

## 3. Immune System Suppression

- **Increased vulnerability to infections** – Bacteria, viruses, and parasites in water, such as E. coli, Giardia, and Cryptosporidium, weaken the immune system, leading to frequent illnesses.
- **Chronic inflammation** – Long-term exposure to chlorine byproducts and heavy metals can cause persistent inflammation, increasing the risk of autoimmune diseases.

## 4. Organ Damage & Cancer Risk

- **Liver & kidney damage** – Heavy metals (lead, cadmium, arsenic) and industrial pollutants accumulate in these organs, impairing detoxification and leading to chronic disease.
- **Higher cancer risk** – Contaminants like PFAS, nitrates, and disinfection byproducts have been classified as carcinogenic, increasing the likelihood of bladder, liver, and kidney cancer.

## 5. Reproductive & Developmental Issues

- **Fertility problems** – Pollutants such as lead, pesticides, and pharmaceutical residues reduce sperm quality and disrupt reproductive health.
- **Birth defects & developmental delays** – Pregnant women exposed to contaminants like nitrates, lead, and mercury face higher risks of miscarriage, low birth weight, and congenital disabilities.

## 6. Gastrointestinal & Digestive Disorders

- **Stomach pain & diarrhea** – Bacterial contamination leads to infections like E. coli poisoning, causing severe digestive distress.
- **Long-Term gut health damage** – Chemical pollutants and antibiotic residues disrupt the gut microbiome, leading to chronic digestive disorders.

# Key features and benefits

## Direct flow system

With **no reservoir**, AqueenaEvo delivers healthy clean water instantly – no risk of bacterial growth and no tank maintenance.

## 2:1 Pure-to-Drain Ratio

Conserves **up to 8 times** more water compared to standard reverse osmosis systems.

## Easy DIY

Replace filters yourself in seconds with our **snap-in** mechanism – no tools, no technician, no mess. Just twist, click, and you're done. **Effortless!**

## Compact and versatile:

Its sleek, compact design fits **on the countertop** or **under the counter**, giving you flexible installation without sacrificing space or convenience.

## Protects Health

99.9% clean water from AqueenaEvo fuels every cell, supports hormonal balance, strengthens immunity, and sharpens mental clarity. For every sip, every meal, every need!

## Lowers Water Bills

Eliminate the cost and hassle of buying heavy plastic bottles with an endless source of clean, healthy water straight from the tap. With an efficient 2:1 pure-to-drain ratio, AqueenaEvo also saves thousands on water bills over the years. Save money today, and for a lifetime!

## Eco-Conscious Solution

Enjoy clean, safe water with the confidence of making an environmentally and economically responsible choice.

# Intuitive Display Panel - keeps you **informed**

The smart LED display panel provides real-time monitoring of the system's status:

## Operating Status Display:

The icon is blinking during water purification process and stays lit when the device is in the standby mode.

- **Filter Status:**

For each filter, the white icon that glows steadily starts to dim over time and when blinking it indicates the filter needs replacement.

- **Rinsing Status:**

A brief 6-second light flashes during the system's auto-flush cycle, cleaning the RO membrane to remove buildup and protect performance.

- **Reset Function:**

To reset the system, press and hold the Reset button for 3 seconds. You'll hear a beep, and the selected filter light will turn solid—this confirms a successful reset and the system returns to normal. If there's no action within 10 seconds, the system will exit reset mode and automatically flush.

# Commitment to **quality** and **safety**

Rigorously tested and certified, AqueenaEvo delivers top-tier filtration performance you can trust.

Prioritize your health and well-being with AqueenaEvo – enjoy the confidence of knowing your water is free from harmful contaminants.

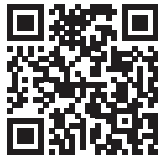

## Technical information

|                                       |                             |
|---------------------------------------|-----------------------------|
| Product name                          | AqueenaEvo                  |
| Item code                             | WT-600                      |
| Dimensions                            | 35.5 x 15.2 x 33.1 cm       |
| Voltage                               | 200 - 240V 50-60Hz 2.5A Max |
| Operating pressure                    | 15 - 60 psi                 |
| Product recovery rate                 | ≥ 65%                       |
| Inlet water temperature               | 5 - 37°C                    |
| Maximum inlet water TDS value         | ≤1000 ppm                   |
| Maximum daily water production volume | 2000L                       |
| Self-flushing system                  | Yes                         |
| Electric shock protection type        | III Type                    |
| Tank capacity                         | None (Tankless design)      |
| Suitable water quality                | Municipal tap water         |
